HELP Document for Akruti Apartment

In the file given to you, you will find one file named as "Apartment.zip". In order to run this project you need to follow below steps.

1. Install latest versions of XAMPP from below links.

   XAMPP:https://www.apachefriends.org/download.html

2. After installing XAMPP under htdocs folder unzip the folder apartment.zip and give **"Akruti"** as file name.
3. Under main XAMPP folder you will find xampp-controll.exe file. Run that and start apache and sql servers.
4. After running the servers, open phpmyadmin and create database by name "ams".
5. Go to "ams" database and import "ams.sql" file. This will load all database tables.
6. Go to any web browser and type

   "localhost/Akruti/index.php". Make sure that system is connected to working internet connection.

After running this 6 steps successfully you will be able to see the homepage of the system. This system has mainly 4 Stake-holders apart from normal users, their login details are as follows:
